HOW TO APPLY Glitz

Copper Penny

For FINE glitter, select your Glitz colourway, and have the glitz adhesive ready for application.

Wait approx. 10-20 seconds for the adhesive to become tacky, then apply your glitz glitter with a dabbing motion.

Make sure to apply your foundation, and eyeshadow before the adhesive. Glitz glitter should be applied last.

After applying wait to dry before fully opening eyes to prevent smearing and smudging. Glitz adhesive keeps all loose product adhered to any skin surface without dulling the sparkle. The Glitz adhesive also prevents cracking, flaking or floating, offering a comfortable all day hold that dries completely with easy removal. For a more dramatic look, add liquid eyeliner and false lashes.

Apply a thin layer of Glitz adhesive to the area you'd like the glitter adhered to.

For our Chunky glitter, follow the same steps. Please note however, that our chunky glitz glitter is more suitable for the face, body, hair & nails. Chunky glitz isn't recommended for use directly on the eyes - however our glitz finer glitters are eye safe, as well as being suited to all other applications.
