

HOW TO APPLY *Glitz*

1 Select your Glitz colourway, and have the glitz adhesive ready for application.

2 Make sure to apply your foundation, and eyeshadow before the adhesive. Glitz glitter should be applied last.

3 Apply a thin layer of Glitz adhesive to the area you'd like the glitter adhered to.

4 Wait approx. 10-20 seconds for the adhesive to become tacky, then apply your glitz glitter with a dabbing motion.

After applying wait to dry before fully opening eyes to prevent smearing and smudging .
Glitz adhesive keeps all loose product adhered to any skin surface without dulling the sparkle.
The Glitz adhesive also prevents cracking, flaking or floating, offering a comfortable all day hold that dries completely with easy removal. For a more dramatic look, add liquid eyeliner and false lashes.
